GUARANTEE

WE GUARANTEE that nothing but the very highest-grade materials enter into the construction of any of our Iron or Wire Fences and Gates, that the workmanship and construction throughout are such as will conform to every illustration and description contained in this catalog. If upon receipt of any shipment the goods are found to be not as represented they may be returned, at our expense, and your money will be cheerfully refunded.

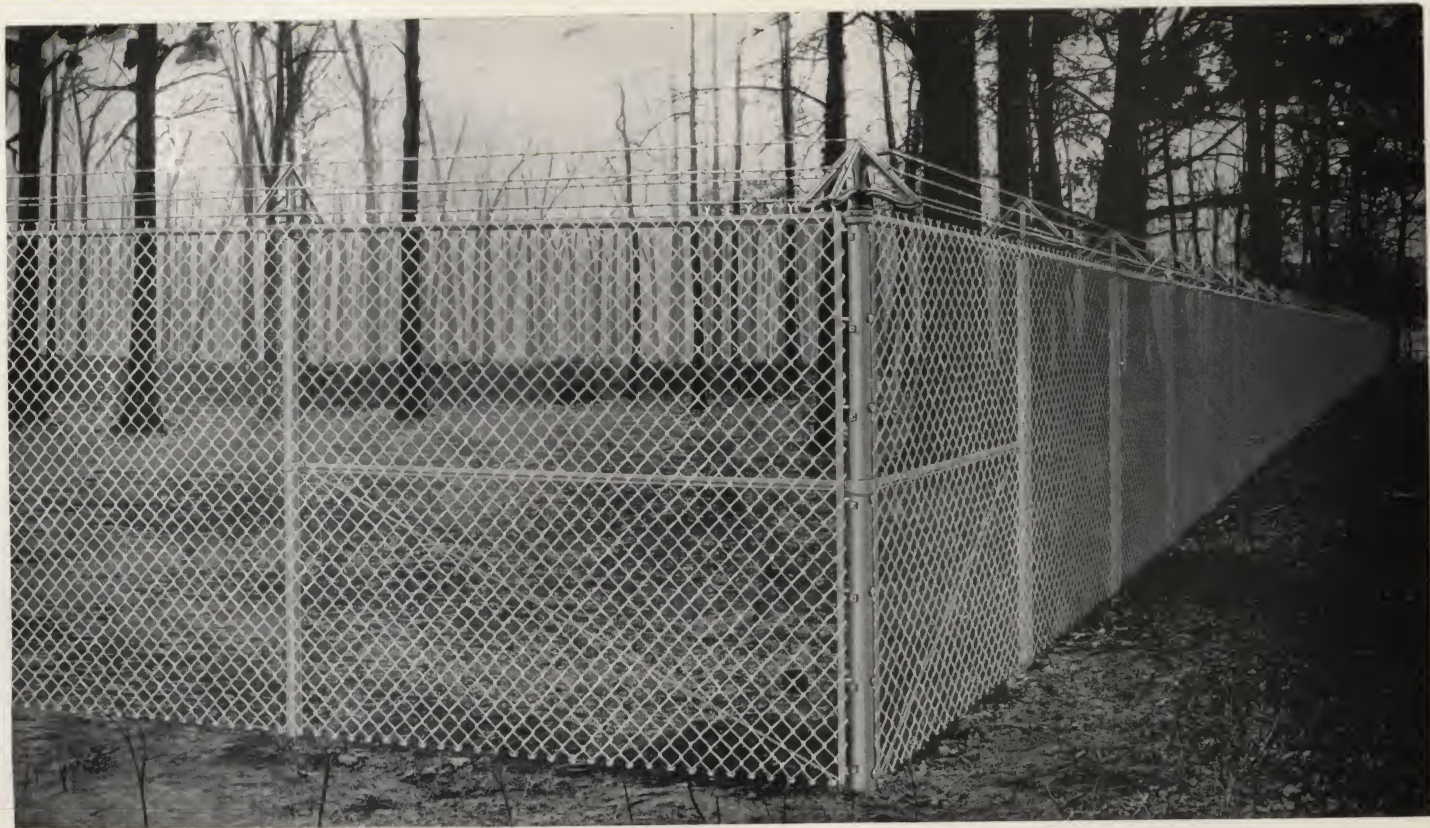

FACTORY AND WAREHOUSE

OFFICES AND SALESROOM

If your needs are not met by styles of fencing shown in this catalog, kindly let us know and we will promptly furnish you with other designs.

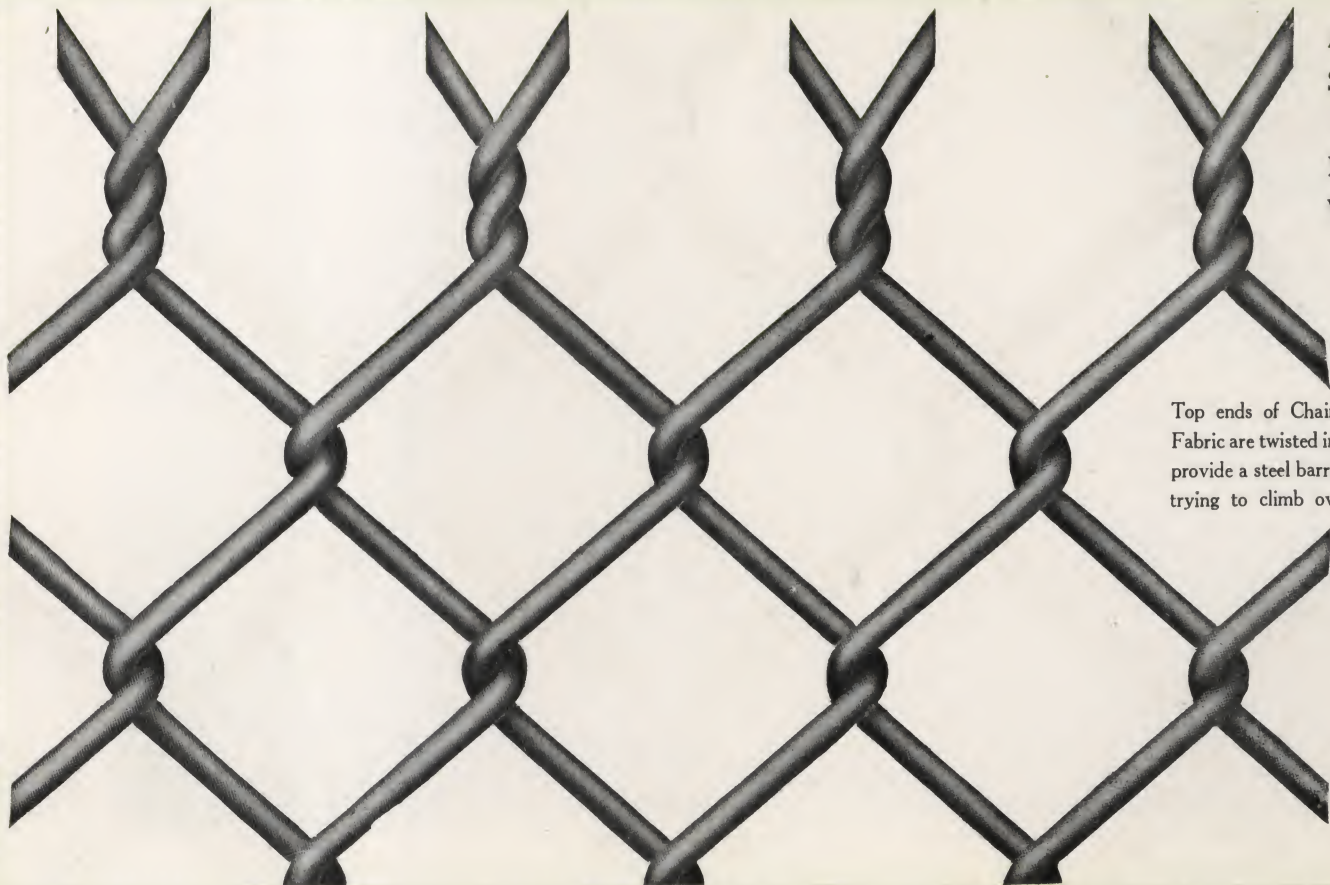

Non-Climbable Chain Fence with 5 rows of barb wires

Actual
Size
2" Mesh
No. 6
Wire

Chain Link Fabric is made of heavily
galvanized wire, No. 6 or 9 gauge
drawn especially for the manufacture
of this fabric.

Actual
Size
 $1\frac{1}{2}$ " Mesh
No. 9
Wire

Top ends of Chain Link Wire
Fabric are twisted into barbs and
provide a steel barrier to anyone
trying to climb over the fence.

Standard Height, 7 feet

Chain Link Invincible Fence

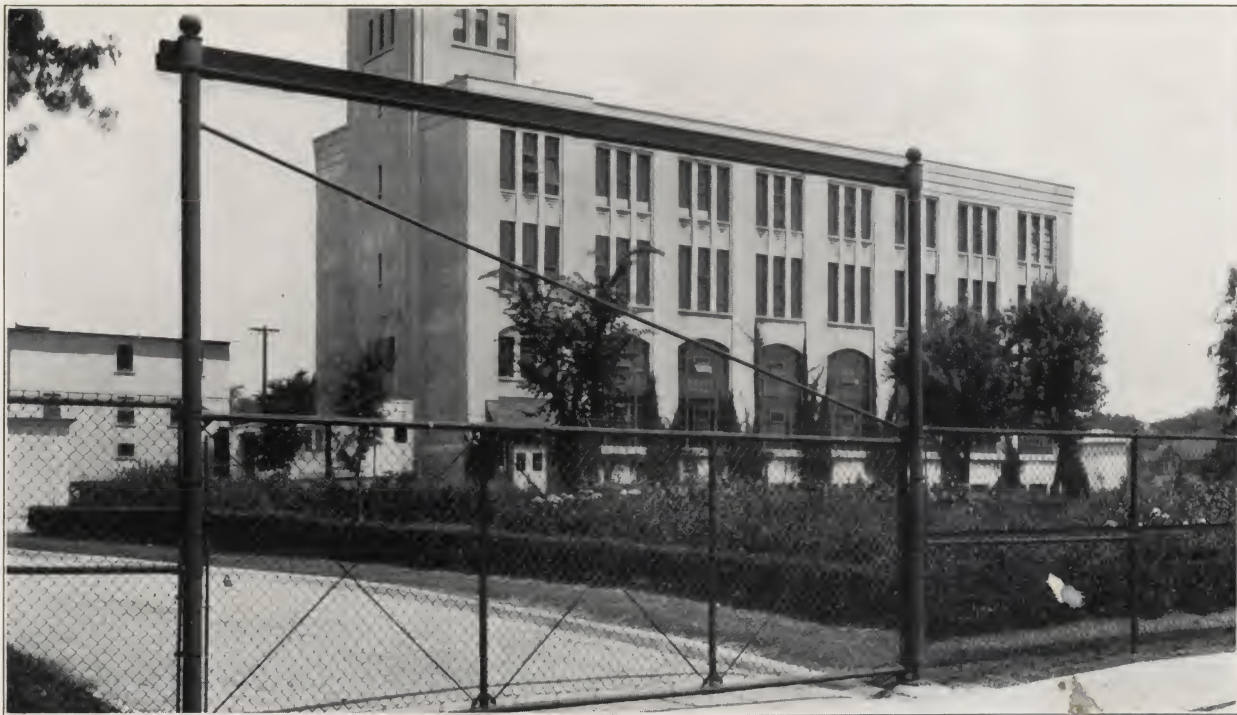

Erected from 5 to 11 feet high

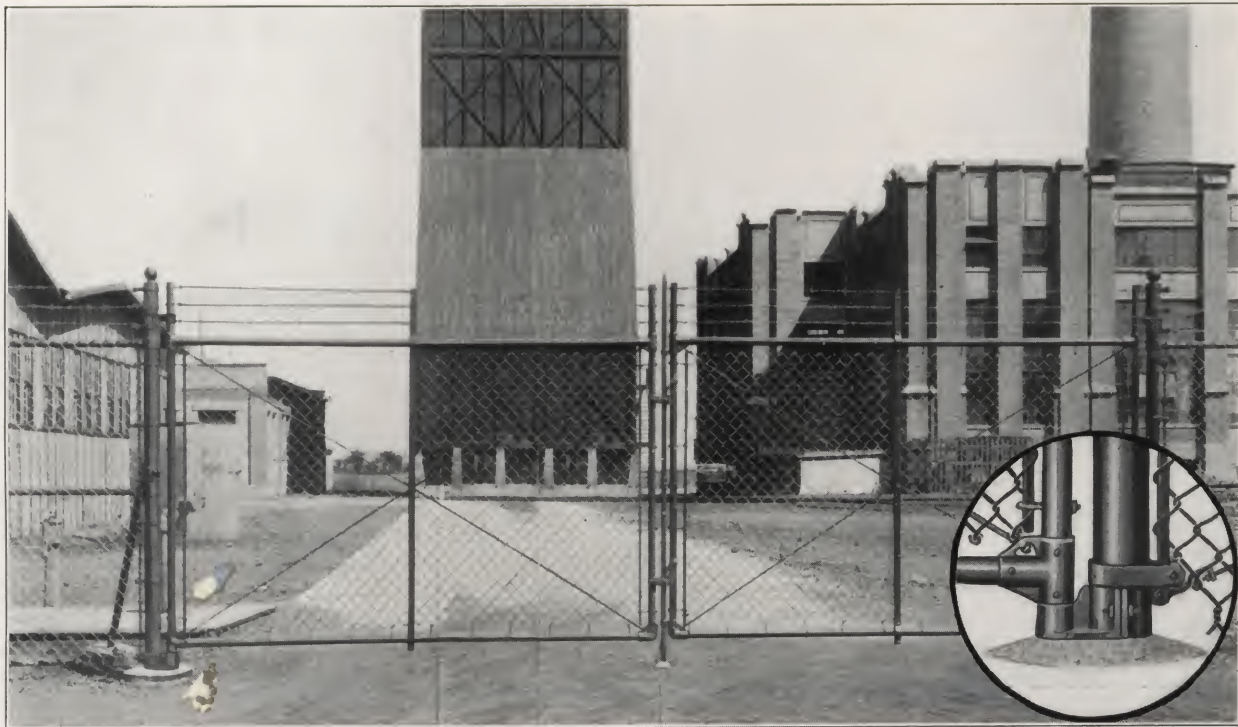

6 feet high

Safeguard Fence

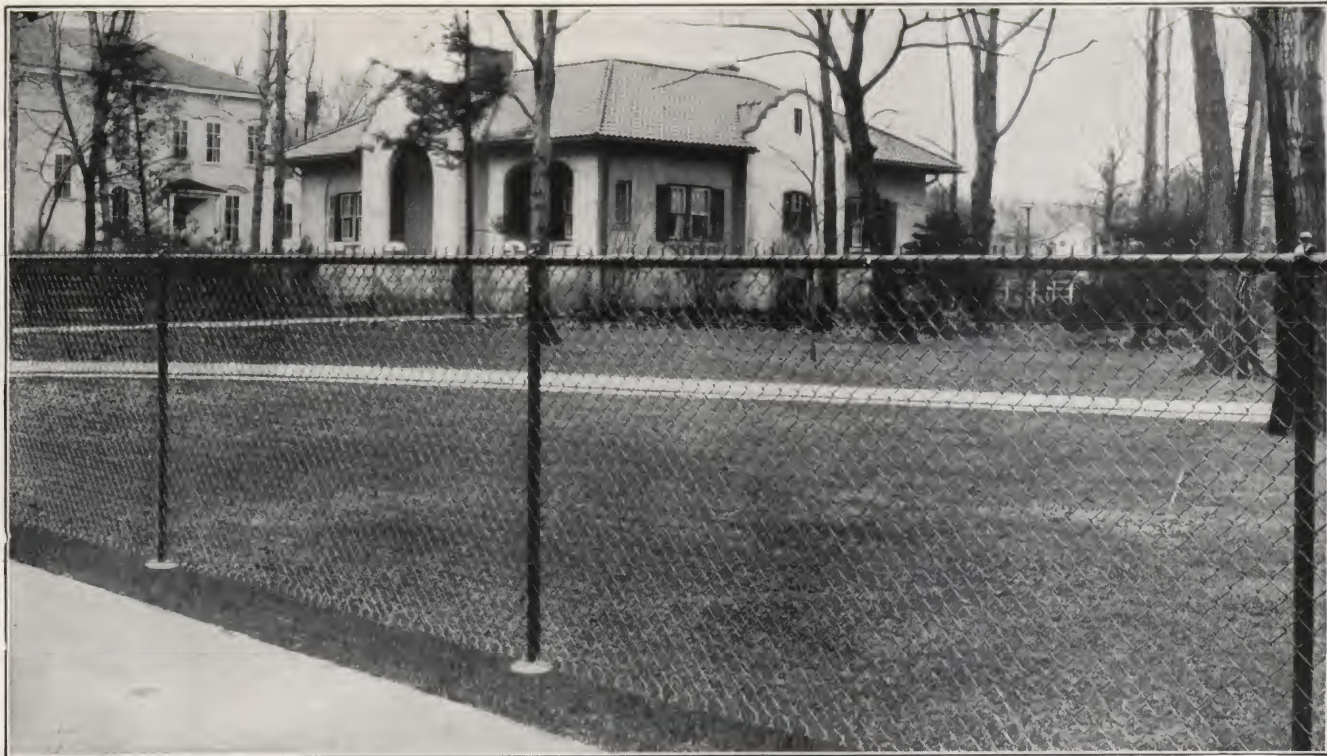

Erected at Riverside Cemetery, Pawtucket, R. I.

Cyclone Sliding Gates built for any height and opening size; to run on overhead enclosed steel track.

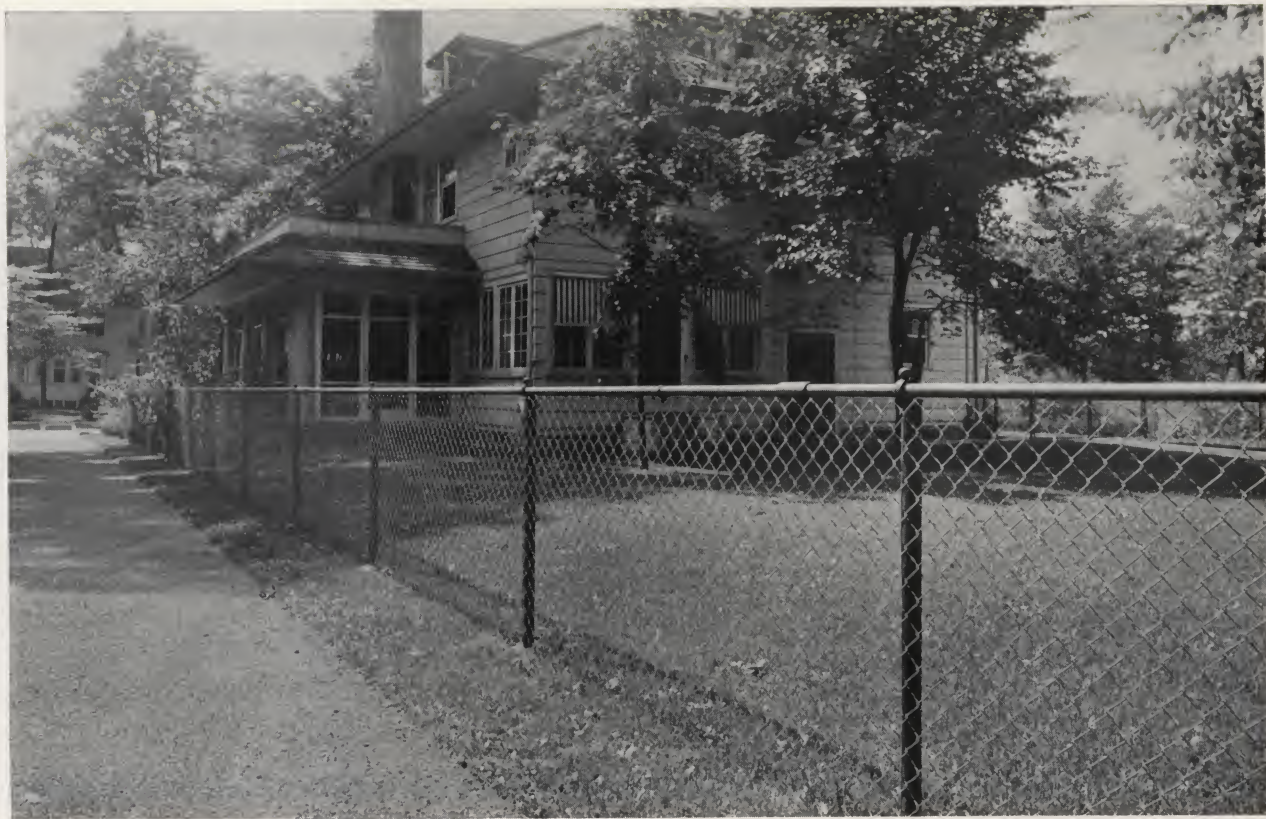

Cyclone Swinging Gates, with pivot hinges. Gates arranged to swing in or out.
Built single-drive or double-drive in any opening size.

Safeguard Chain-Link Fence

SAFEGUARD Fence is especially suited to the requirements of suburban homes. Its elegance of design and sturdy construction make it the correct fencing where attractiveness and effective protection must be considered.

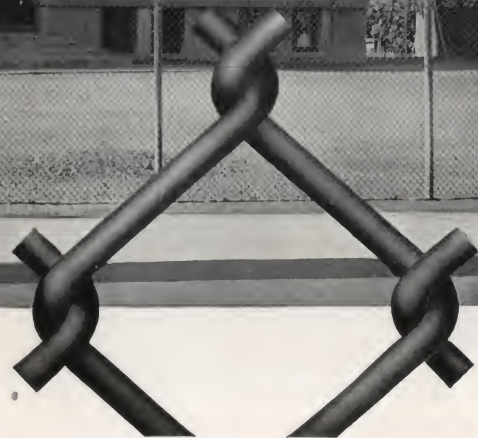

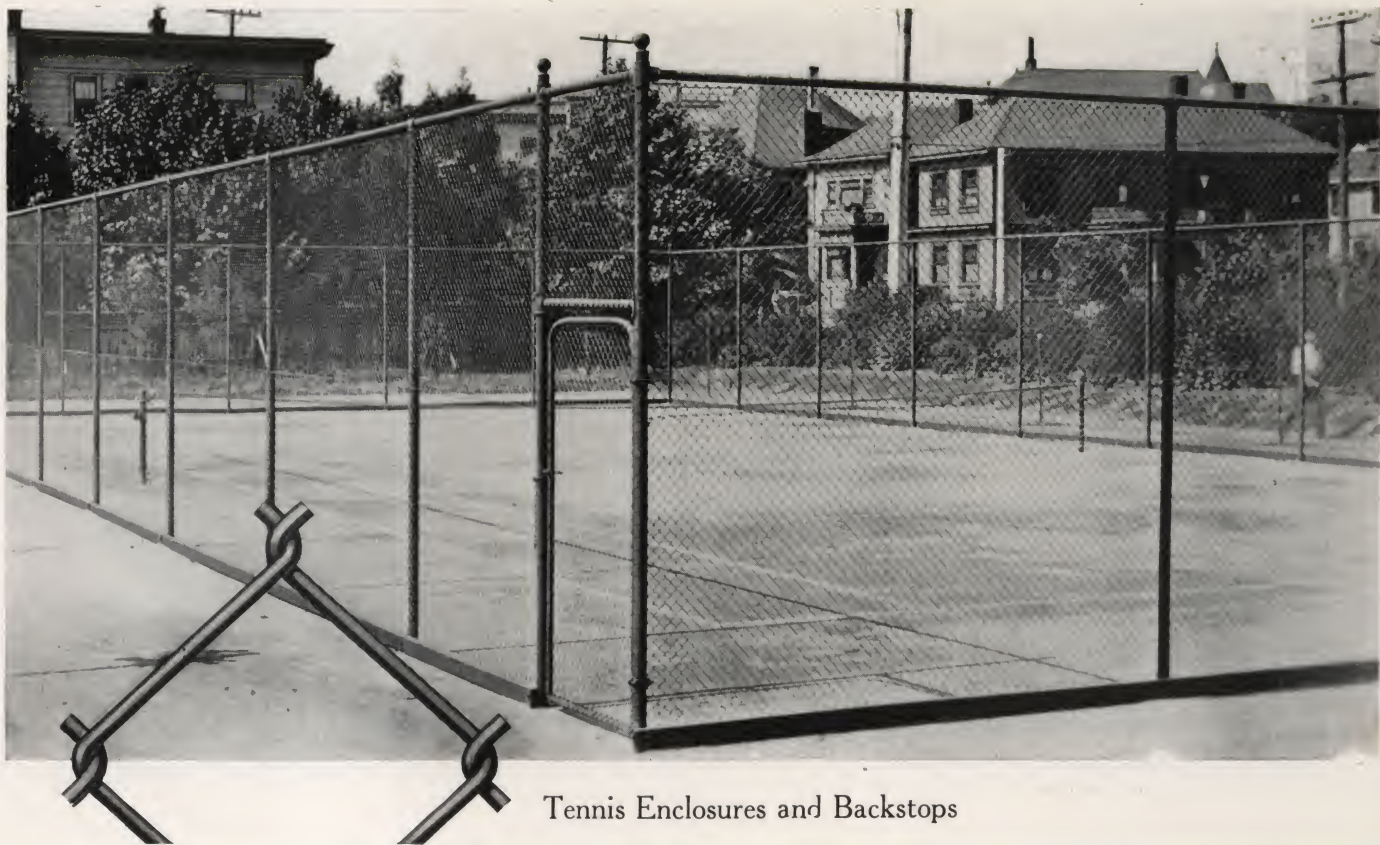

No. 70 Chain-Link Division Fence

Any height to 10 feet

Cyclone Safeguard Fence

Tennis Enclosures and Backstops

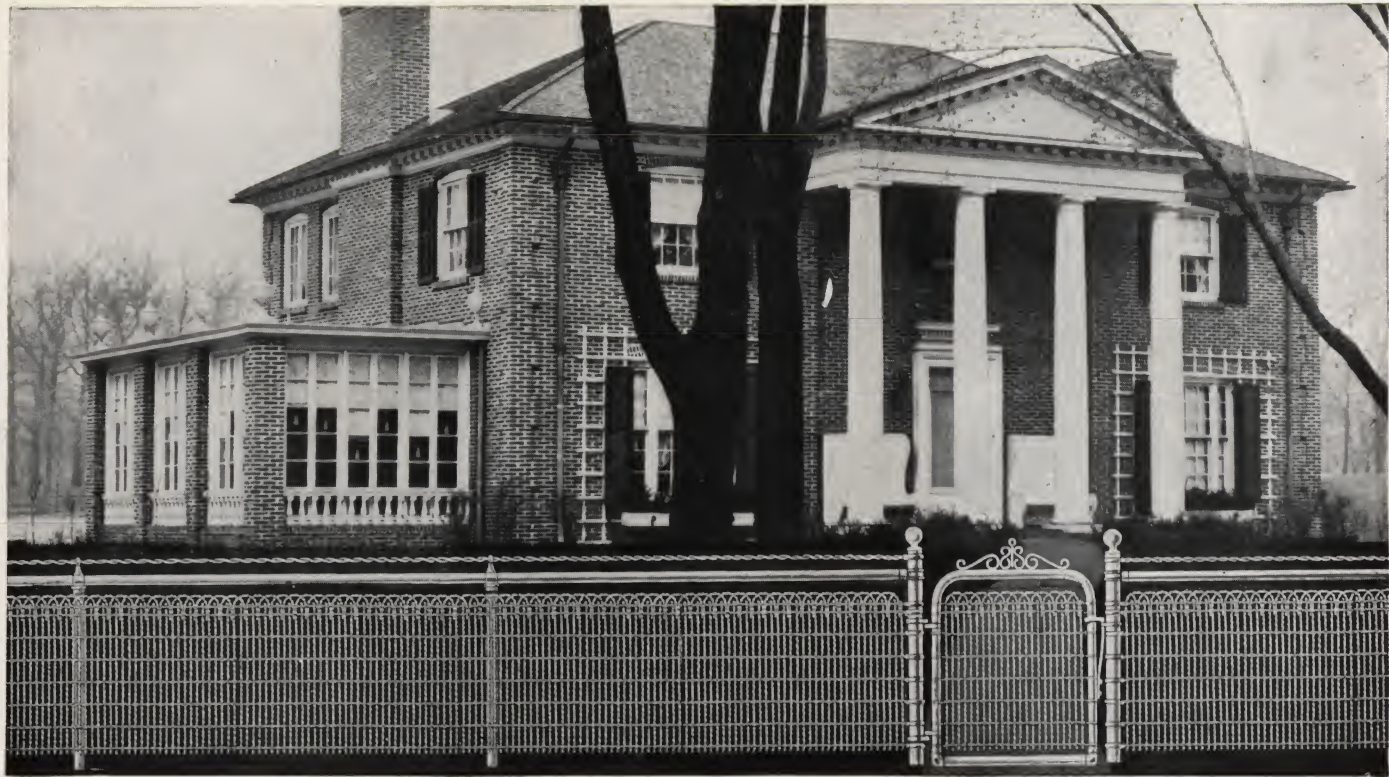

No. 60 Chain-Link Lawn Fence

Height of fence, $3\frac{1}{2}$ feet

Suburban Style Fencing with (F) Fabric

The heavily galvanized cable over top rail gives a finished, sturdy appearance to the fence and protects the railing.

Suburban Style Fencing with (S) Wire
Suburban style fencing suggests strength, dignity and durability.

Meets all requirements—Monarch Style Fencing with (F) Wire—42" High

Made in any height from 30 inches to 48 inches

Colonial Style Fencing with (F) Fabric

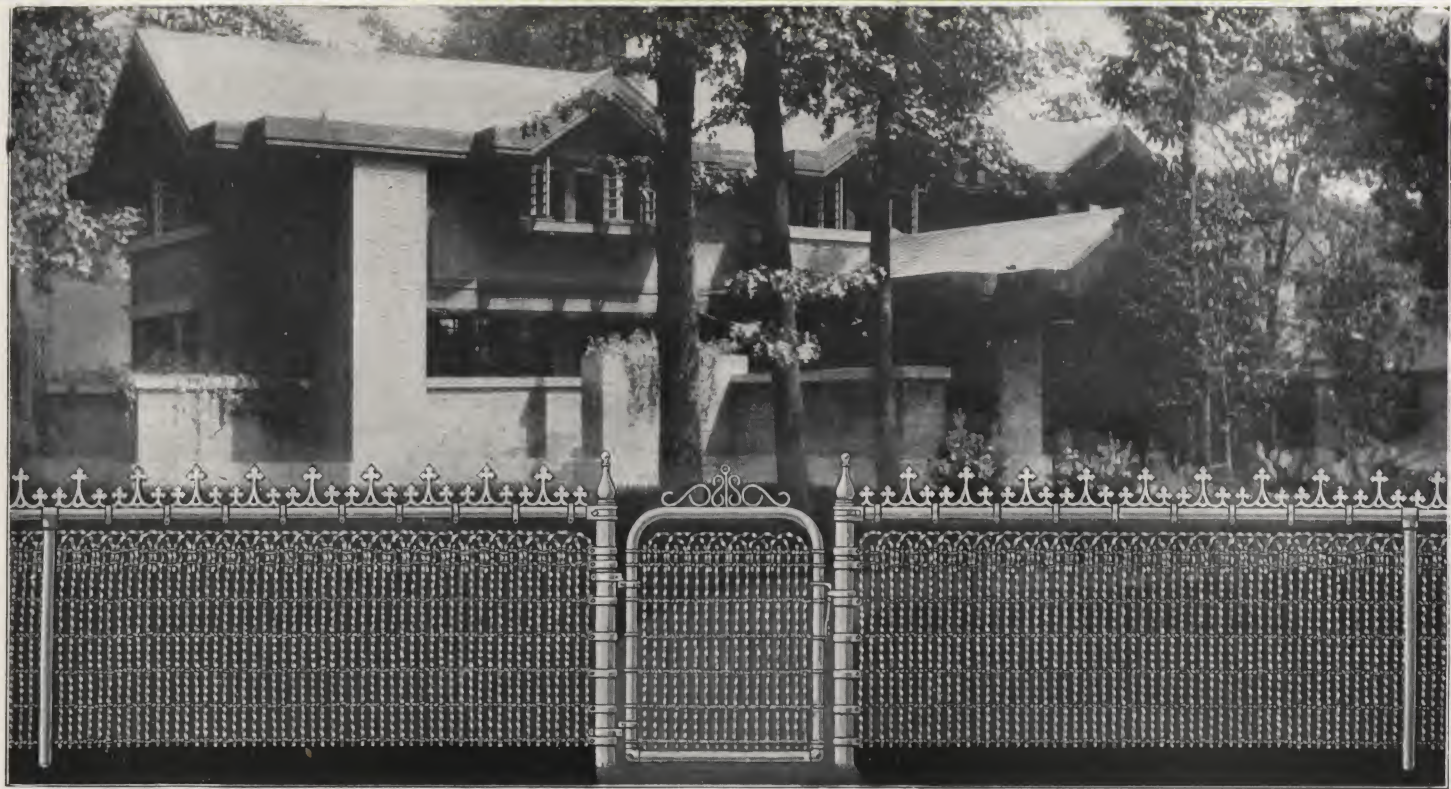

Is suitable for a front or division fence

30 inches to 48 inches high

No. 80 Tee Post Fencing

Suitable for a great variety of purposes

Royal Style Fencing with (S) Fabric

Is exactly the same as Suburban fencing as shown on pages 16 and 17, except heavy malleable cresting is used instead of cable-top.

No. 3 Cemetery Arch

No. 1 Country Home Arch (Naming the Country Home)

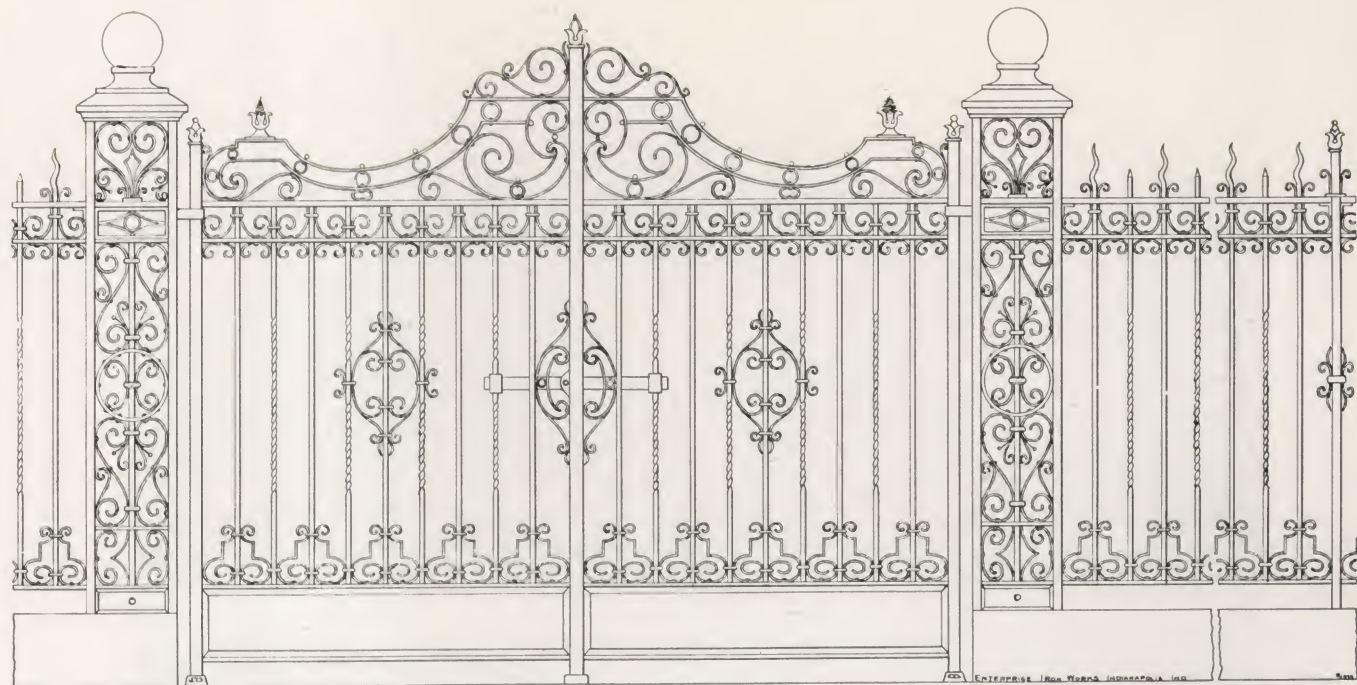

No. 2 Cemetery Arch

Style C 501

A fine example of the modern tendency to attain beauty with practicability in fence design. Note the perfect proportions and good taste evident in this pattern. Built in standard heights with gates for any opening size. Specifications and prices furnished on request.

Panel Posts

Drive Gates No. 429

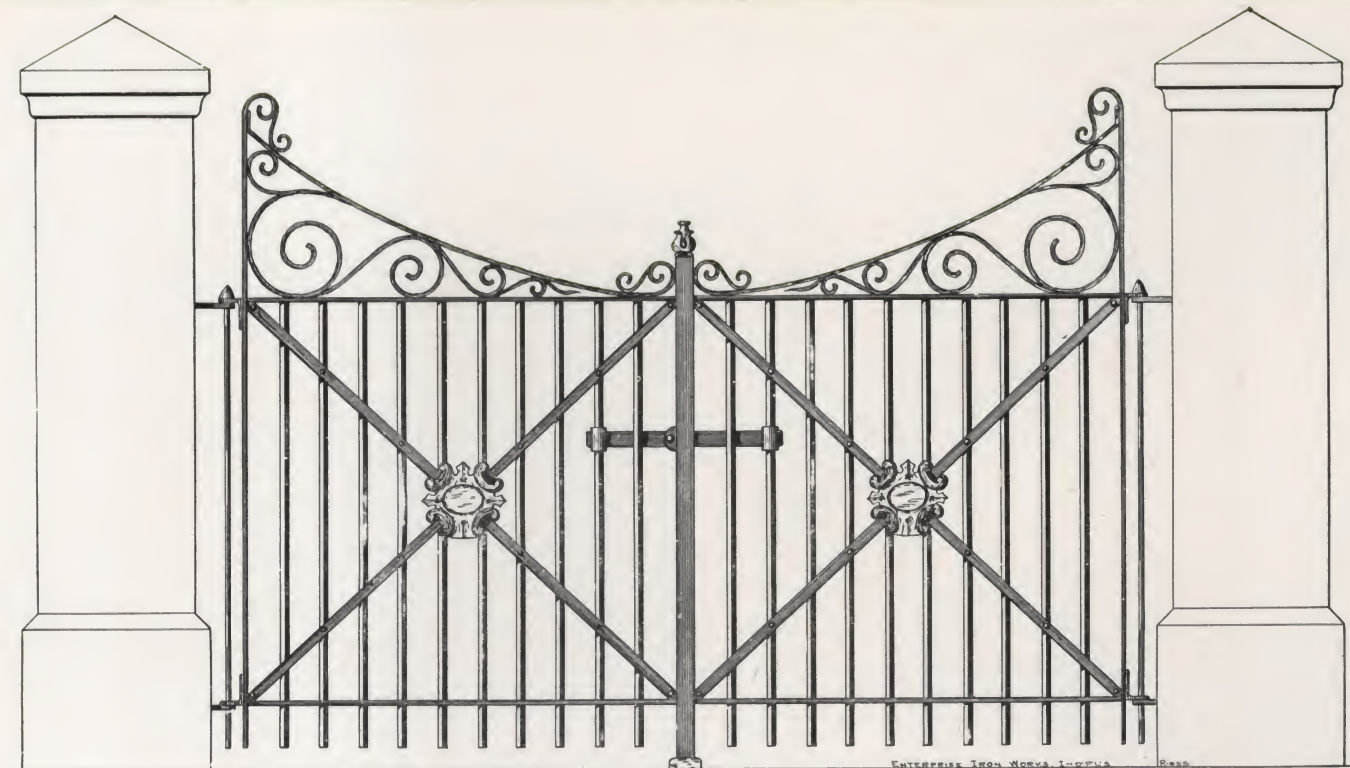

Fence No. 428

Plain and Ornamental Iron Fencing suitable for a great variety of purposes.

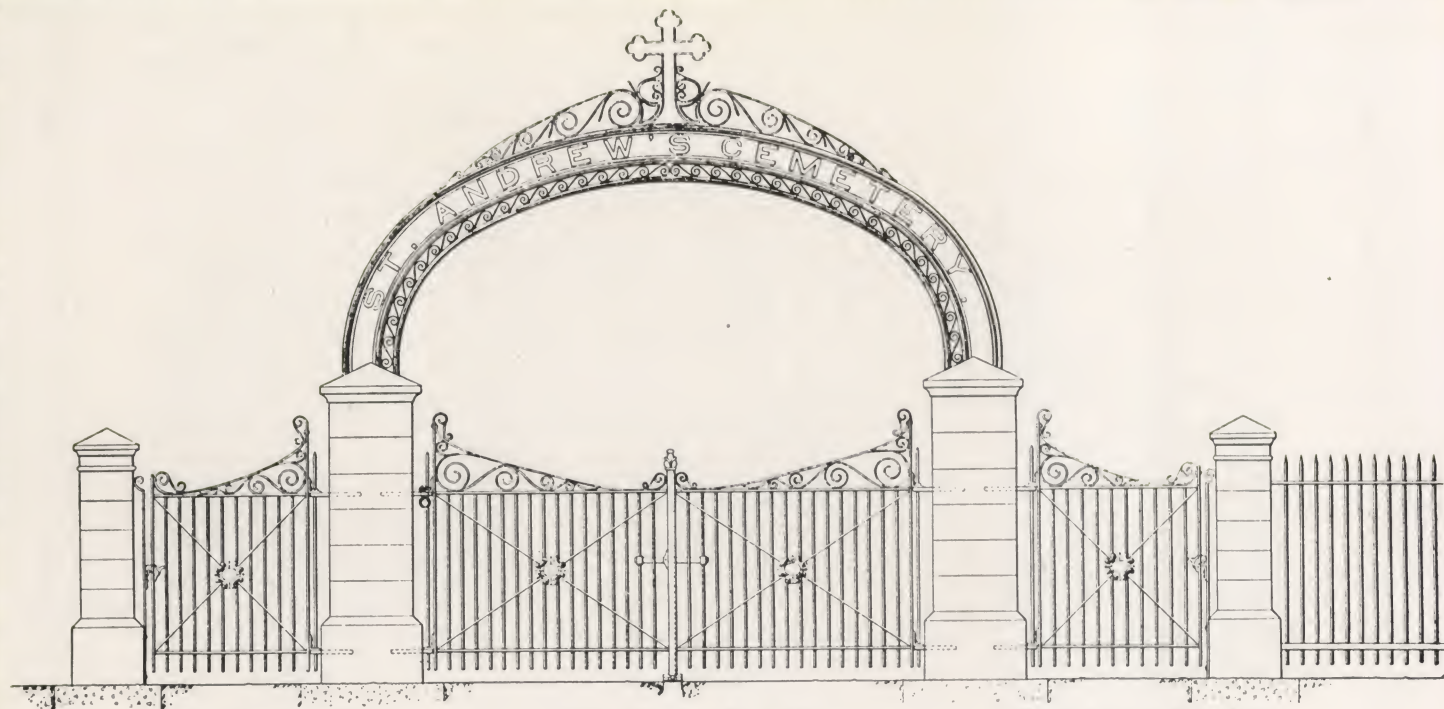

Style C 504

Nothing so adequately expresses the individuality of the home owner like the home enclosed with an attractive iron fence. The pattern shown above is designed especially for enclosing city and suburban residences. Its design is based on the type architects use in homes of distinction and character.

No. 595 Double Drive Gate

This is one of our best designs of special gates which may be used with our fencing for a main entrance or other roadway where an ornamental design is desired. It is made of any size pickets and height to match fencing used. The gates may, of course, be sold separately if desired.

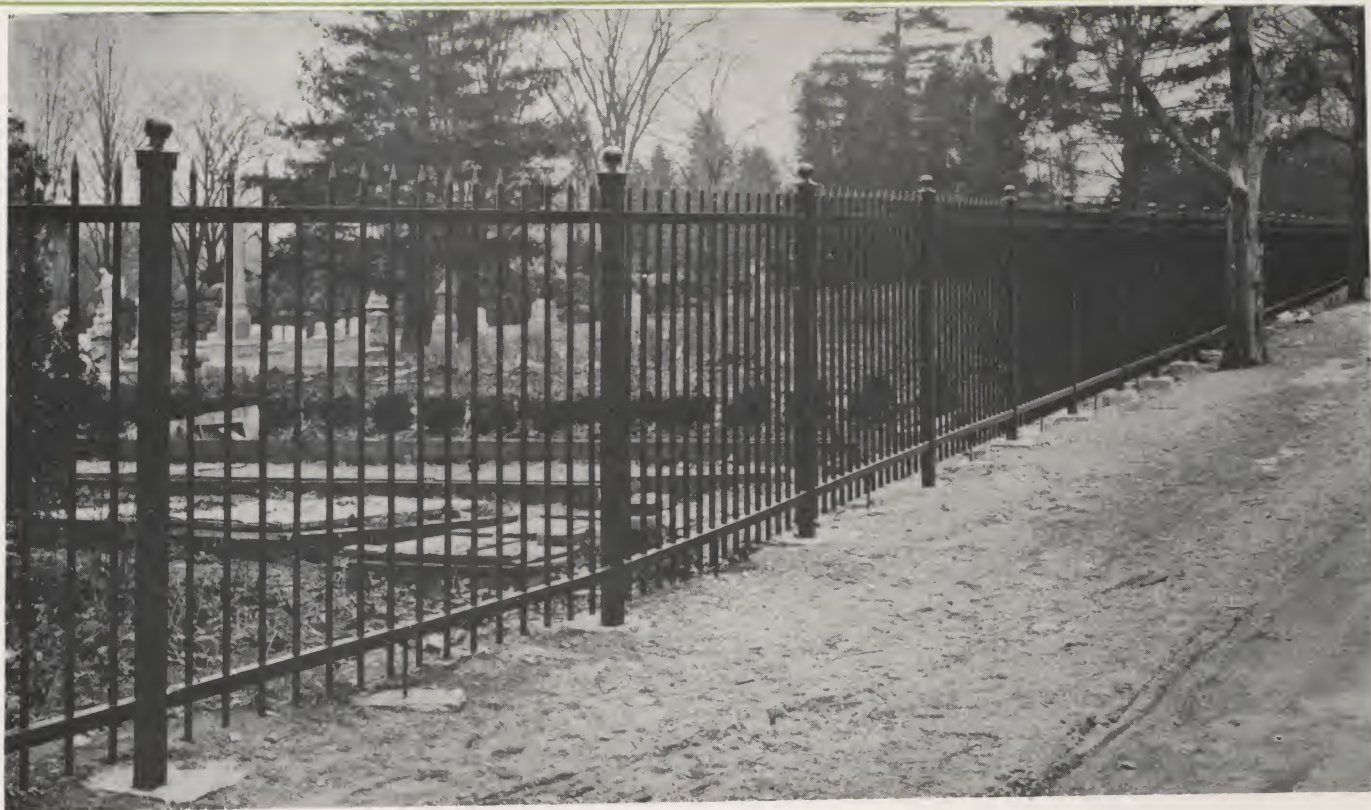

Arch No. 1020

Drive Gates No. 595

Walk Gates No. 596

ARCH—2-inch square tubular steel frame, with letters 6 inches high. STANDARD WIDTH OPENING—10 or 12 feet between posts. Can be made any width desired. GATES— $\frac{1}{2}$, $\frac{5}{8}$ or $\frac{3}{4}$ -inch pickets, round or square.

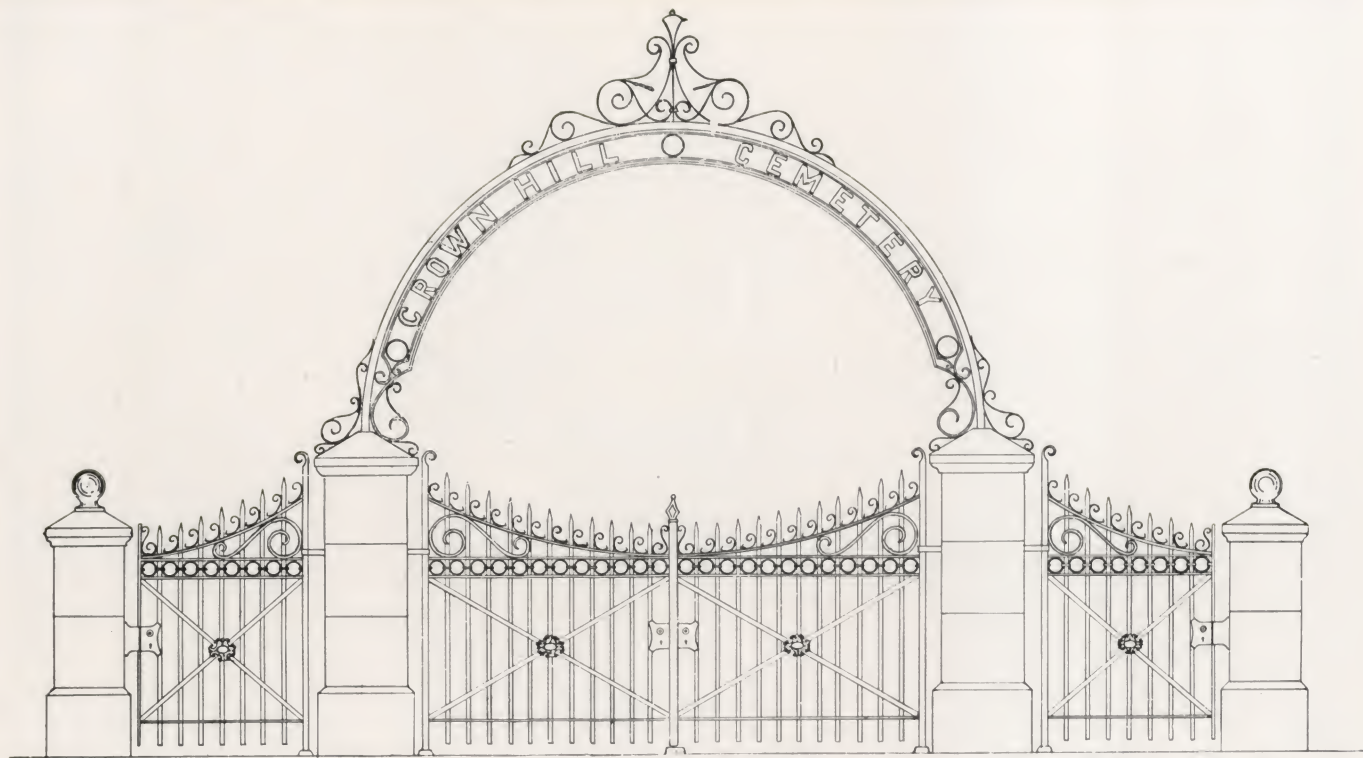

Gates may be sold separately and may be hung on iron, stone, brick or concrete posts. Gates can be made for any height or width opening and are interchangeable with all arches

6 feet high

No. 525 Fencing with ball tops on I Beam line posts
Designs especially suitable for cemeteries and church properties.

Erected at Riverside Cemetery,
Pawtucket, R. I.

Arch No. 1287

Drive Gates No. 613

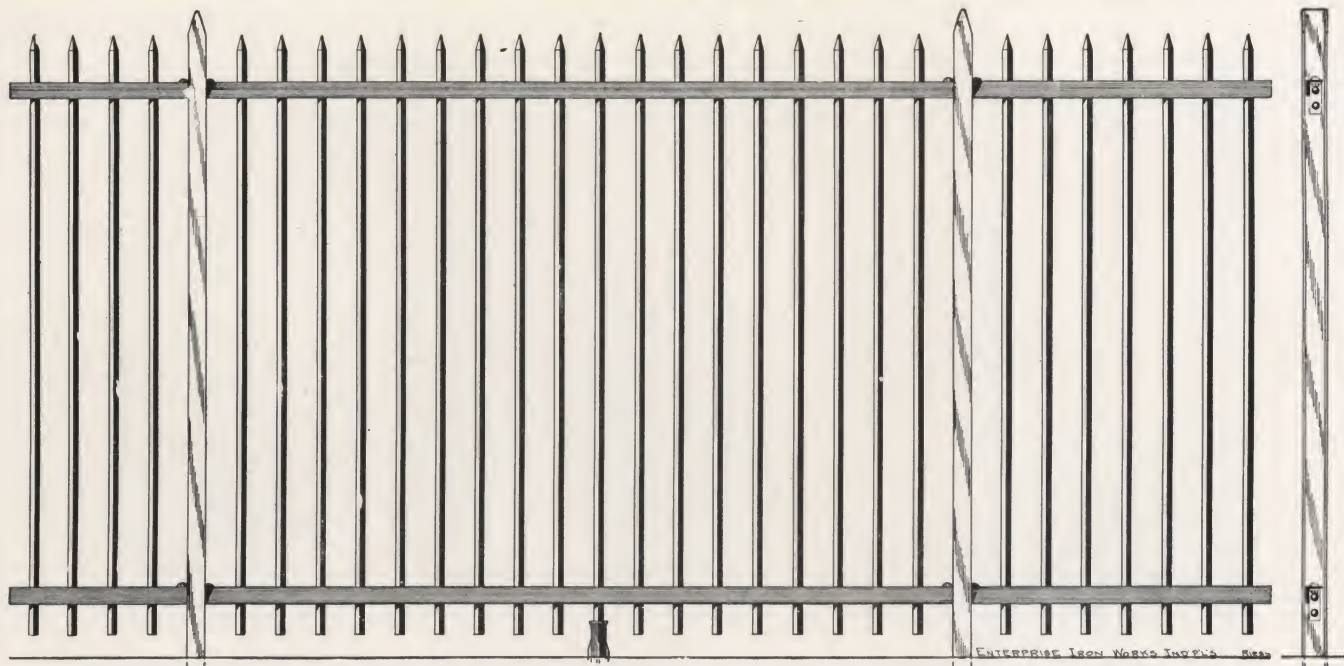

Walk Gates No. 611

We specialize on the better and higher grades of iron fencing and arches for cemetery work.

Style C 502

A design somewhat ornate yet possessing the dignity so essential in an iron fence. This design imparts an unusually distinctive artistic effect to premises enclosed and indicates refinement and care in the selection of appropriate fencing. Specifications and prices furnished on request.

No. 525 Solid Picket Iron Fencing

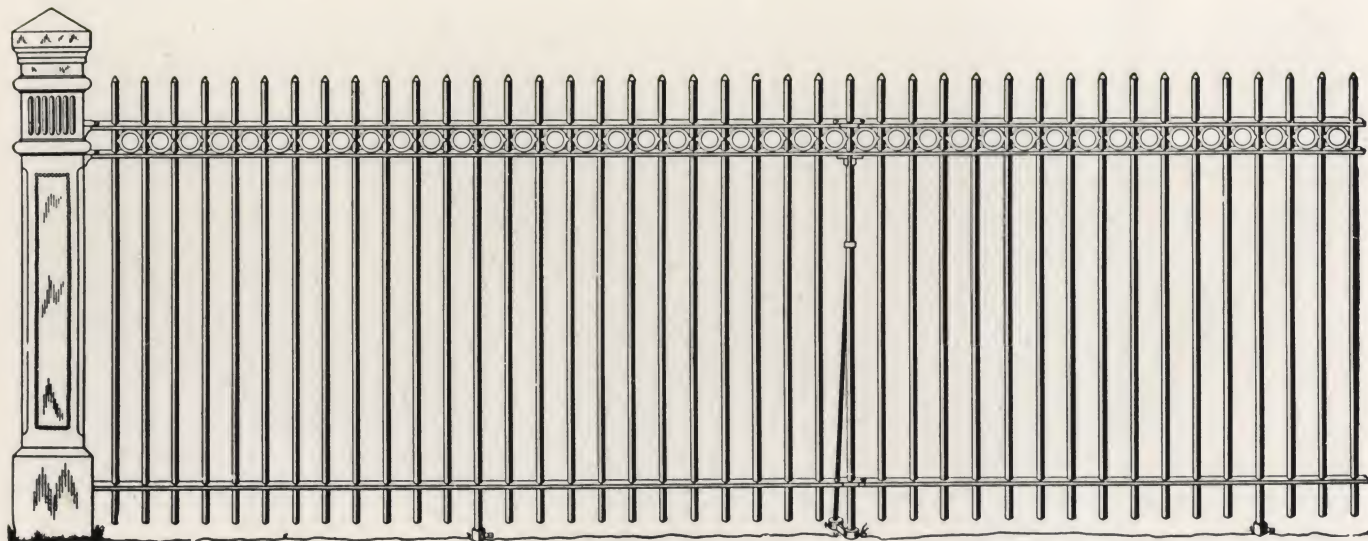

The I beam line post construction is a special feature of this design, and when set in concrete it needs no brace.
Pickets, $\frac{1}{2}$ " to $\frac{3}{4}$ " square or round, any height.

Warwick Mills, Centreville, R. I.

No. 655 Fencing

7 feet high, I beam line posts

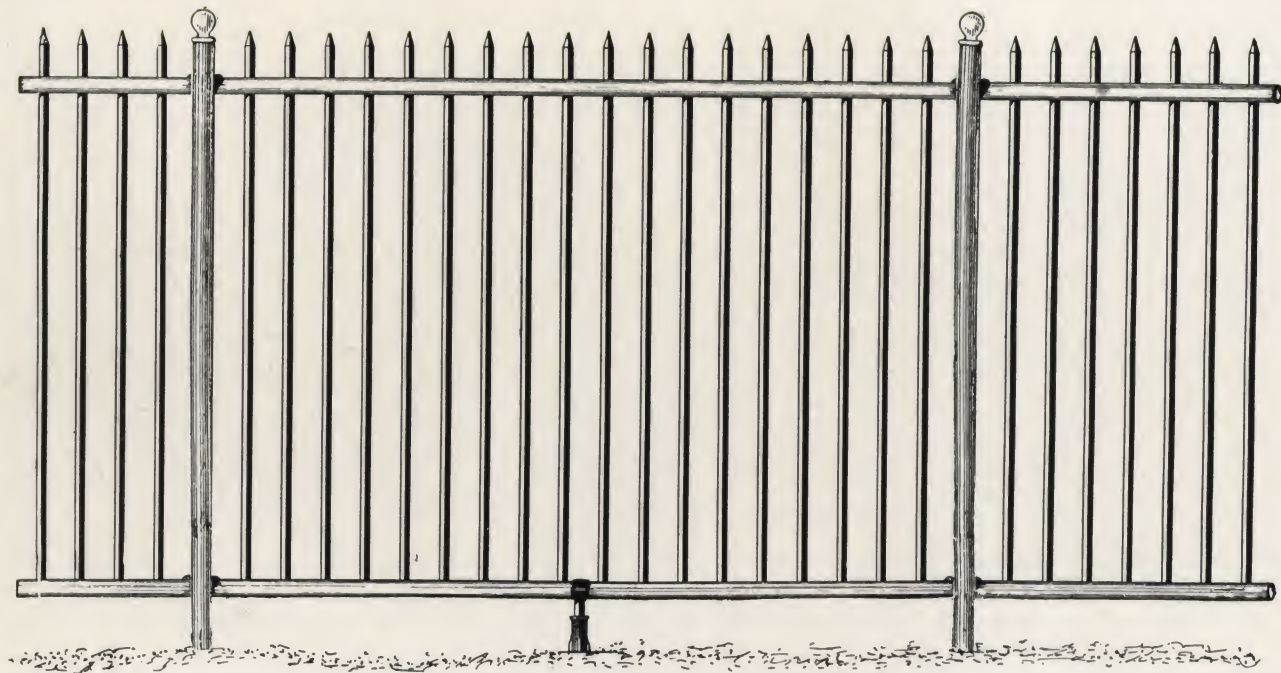

No. 398 Solid Picket Iron Fencing

We will gladly furnish blueprints of other design of fencing upon request.

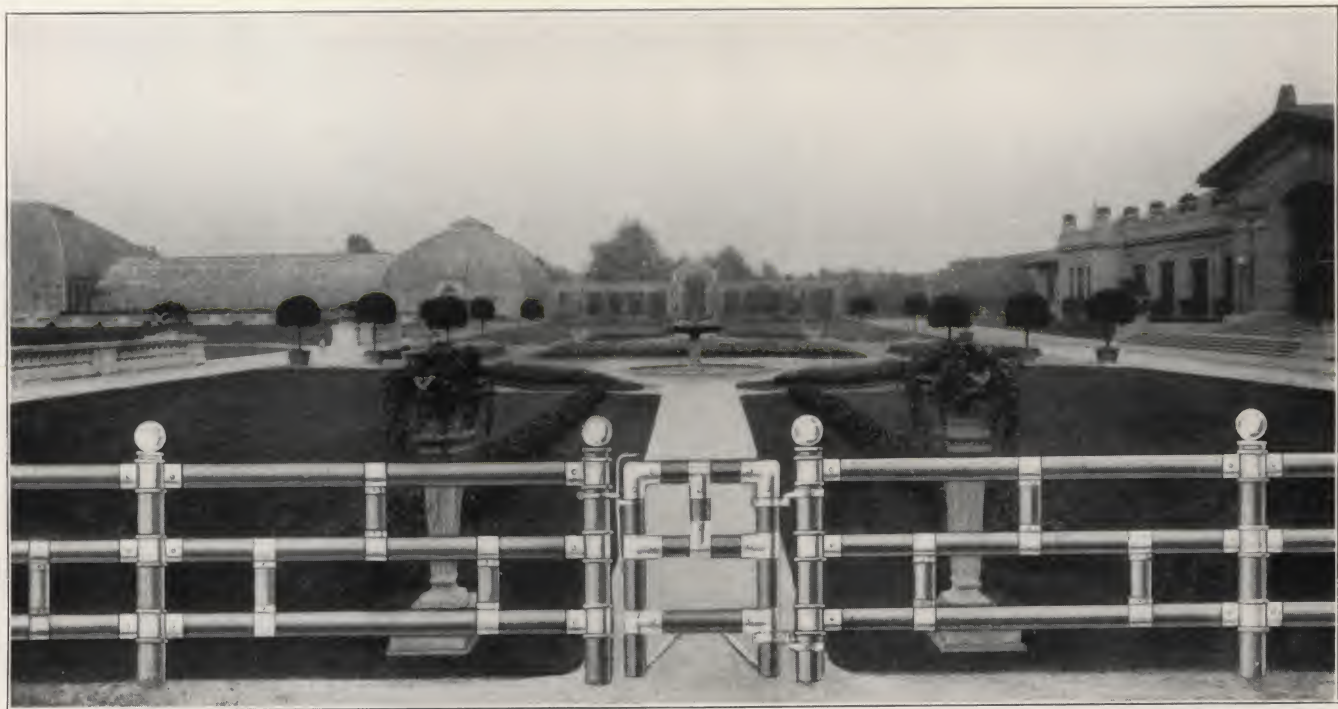

No. 525 Solid Picket Iron Fencing

The I beam line post construction is a special feature of this design, and when set in concrete it needs no brace. Pickets, $\frac{1}{2}$ " to $\frac{3}{4}$ " square or round, any height.

No. 50 Round Railing Fencing

This style of fencing makes a very handsome design.
Is made of round railings and round pickets. The ball tops on each post gives a distinction
and style very pleasing and attractive. Made in any height from 3 feet to 4½ feet.

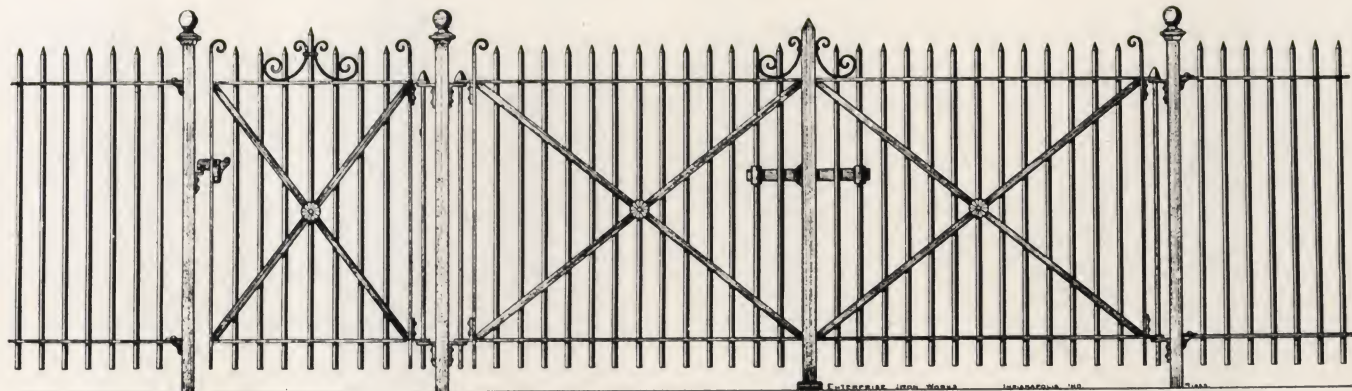

Imparts to grounds a very artistic and pleasing finish. Suitable for public lawns, parks, terraces, private drives and roadways in cemeteries. Made in two styles: "Extra-Heavy" and "Medium." In "Extra-Heavy," posts are $2\frac{1}{2}$ -inch; rails, 2-inch heavy tubular steel. "Medium," posts are 2-inch; rails, $1\frac{3}{8}$ -inch tubular steel. Heights, 36 and 42 inches. Ball post tops. Finished all-galvanized or painted green as ordered. Painted black, if desired.

Style C 503

This design is rather severe in its simplicity. Often, however, fencing of this type is desirable to afford contrast with a rather pretentious background. If it is desired to carry out an entirely plain effect, this pattern will be found equally suitable. Specifications and prices furnished on request.

Walk Gates No. 314

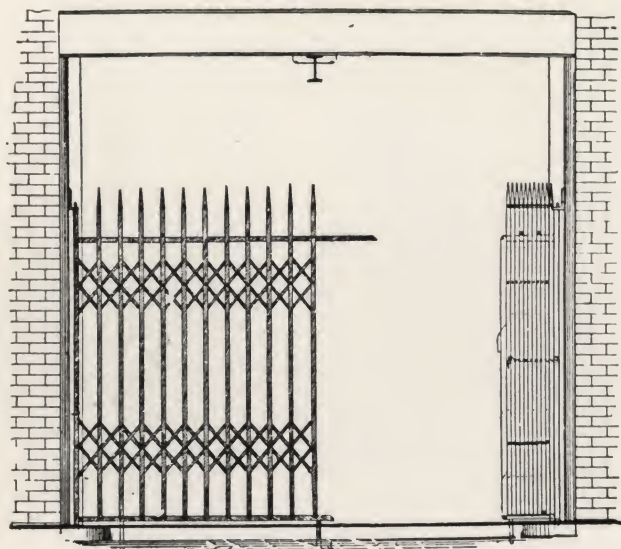

Drive Gates No. 314

Posts No. 130-B

PICKETS— $\frac{1}{2}$, $\frac{5}{8}$ or $\frac{3}{4}$ -inch, round or square.

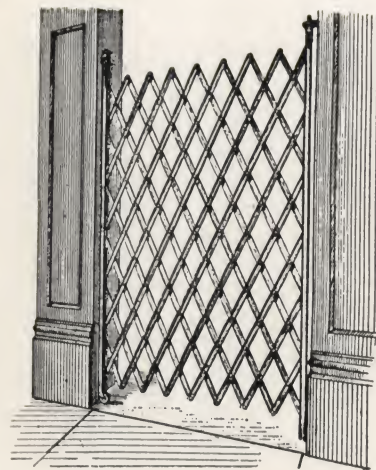

Gates may be sold separately and may be hung on iron, stone, brick or concrete posts.

Gates can be made for any height or width opening.

Pattern C 525

Reliable Folding Gates are made carefully and accurately to insure satisfactory operation. Open and close easily. Made either single or double for any size opening or height.

Pattern C 526

Reliable Folding Gates are especially adapted for banks, offices, stores, factories, etc. Afford ideal barriers for doorways, aisles and enclosures. Made either single or double for any size opening or height

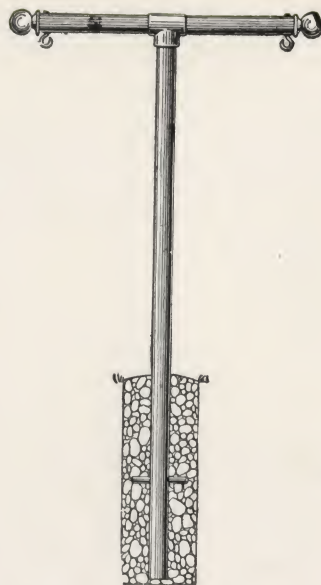

No. 114
Cast Iron Post

No. 127
Cast Iron Post

No. 132
Cast Iron Post

No. 2 Clothes Line Post

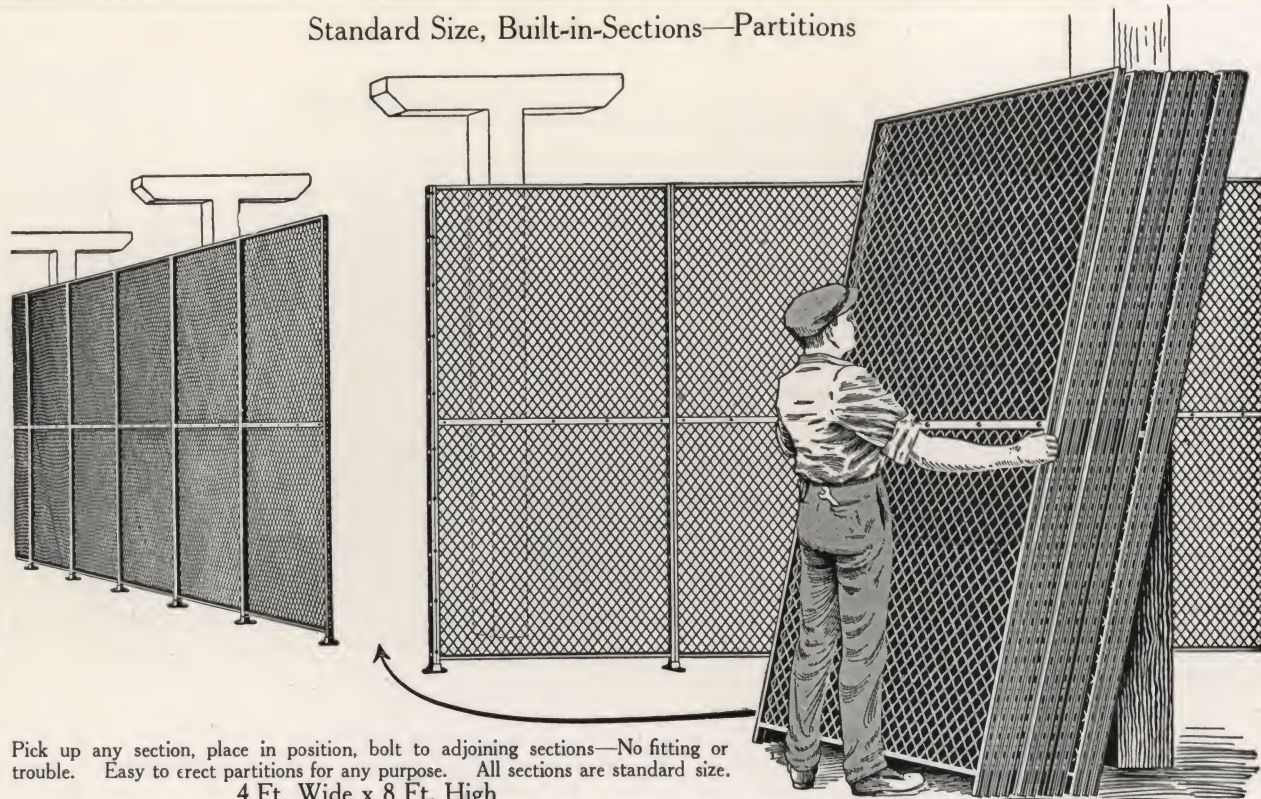

Made of $2\frac{1}{2}$ " steel tubing
9½ feet long
\$8 each

No. 1 Clothes Line Post

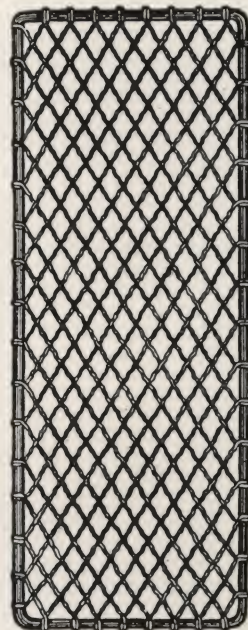

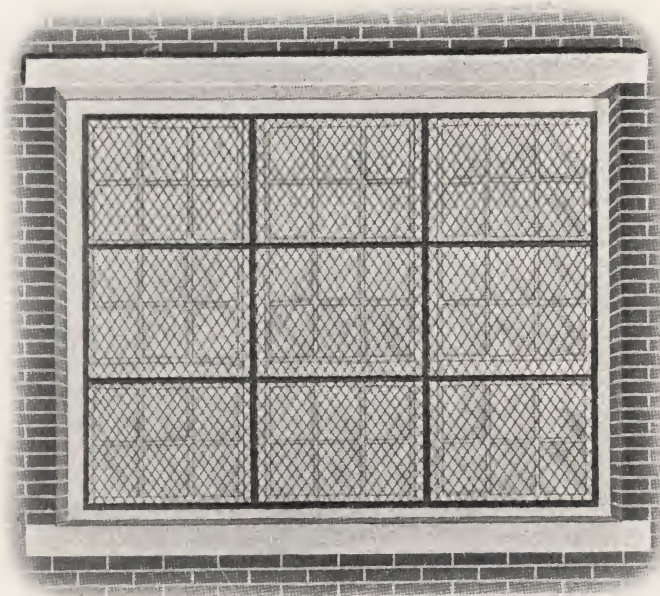

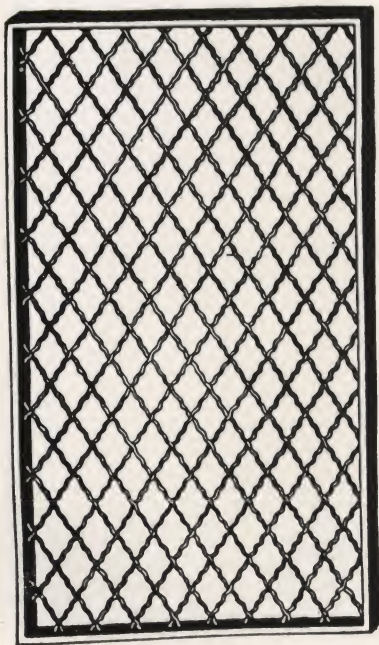

Will not warp, burn or split
\$4.00 each

Standard Size, Built-in-Sections—Partitions

Pick up any section, place in position, bolt to adjoining sections—No fitting or trouble. Easy to erect partitions for any purpose. All sections are standard size.
4 Ft. Wide x 8 Ft. High

Specifications: Frames—1-inch channel iron with floor flanges for wood or concrete floors. Fabric made of No. 10 gauge steel wire woven in a $1\frac{1}{2}$ -in. diamond mesh and securely locked in frame work. Partitions are equipped with either swinging or sliding gates. Hand holes or wickets in partitions or gates provided where desired. All partitions given coat of special black metal paint.

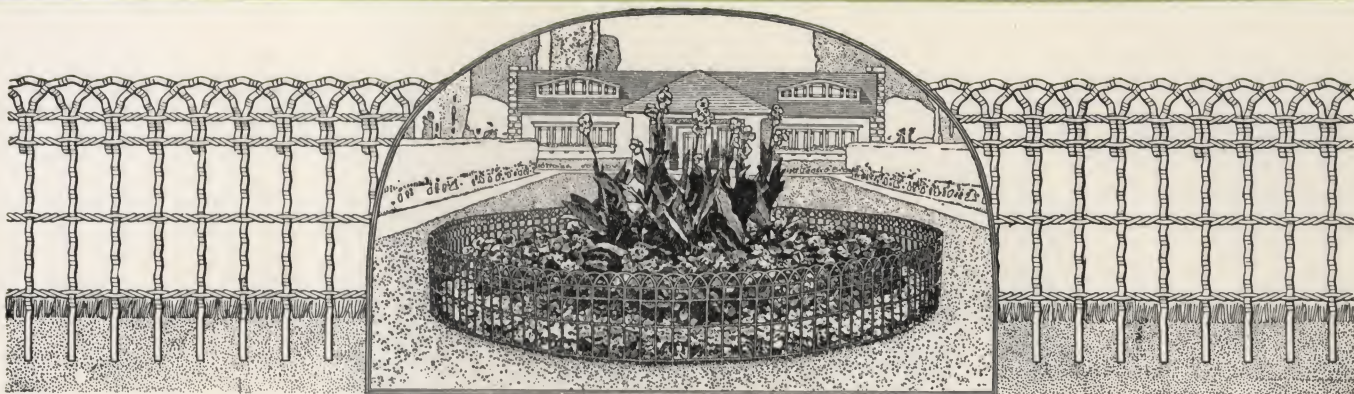

Reliable Window Guards

We make window guards with either channel or round-iron frames.
Will gladly quote prices on your requirements.

Quick Set Fence Posts

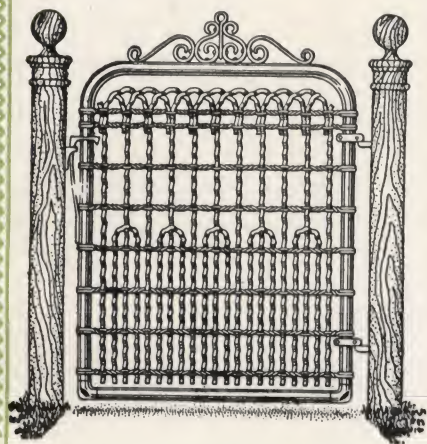

Easy to drive. Can be used for any style wire. Holes on post are punched 2 inches apart. Cannot bend, rot or burn. Made of $1\frac{3}{8}$ " Tee Steel 78 and 84 inches long. They cost less than wood posts and are easy to drive.

Height, 16 and 22 inches

Perfection Flower Bed and Lawn Border

Put up in 10 and 20 rod rolls

Single Walk Gates

Opening feet
3, 3½, 4, 5

Any height up to 48 inches

We also make to order
gates of other sizes

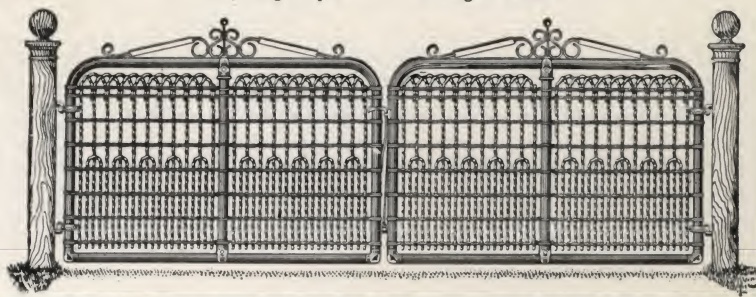

Double-Drive Gates

Opening feet
8, 10

Opening feet
12, 14

Opening feet
16, 18

Any height up to and including 48 inches

NATIONAL FENCE

For
Horses, Cattle, Sheep
Hogs, Poultry
Garden -
Farm Animals

Made in
6" and 12" stays

35" to 58"
high

This fencing is made in various heights and is ample for general farm use. The heavy top and bottom wires make fence rigid and easy to stretch.

Put up in 10 and 20 rod rolls. Ask for prices and National Fence circular.

PORTABLE STEEL GARAGES

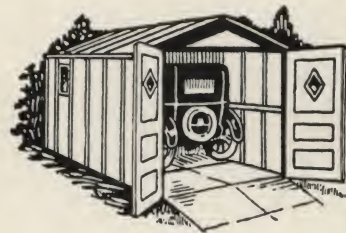

Doors are tight, strong and pleasing in appearance. They will not warp or sag or spring away at the top to let in the rain. Opening, 8 feet x 8 feet.

All frame work, trusses, braces, etc., are of best quality high carbon Angles, *extra stiff*, varying from $1\frac{1}{2}$ x $1\frac{1}{2}$ x $\frac{1}{8}$ up.

MADE OF KEYSTONE GALVANIZED
COPPER-STEEL

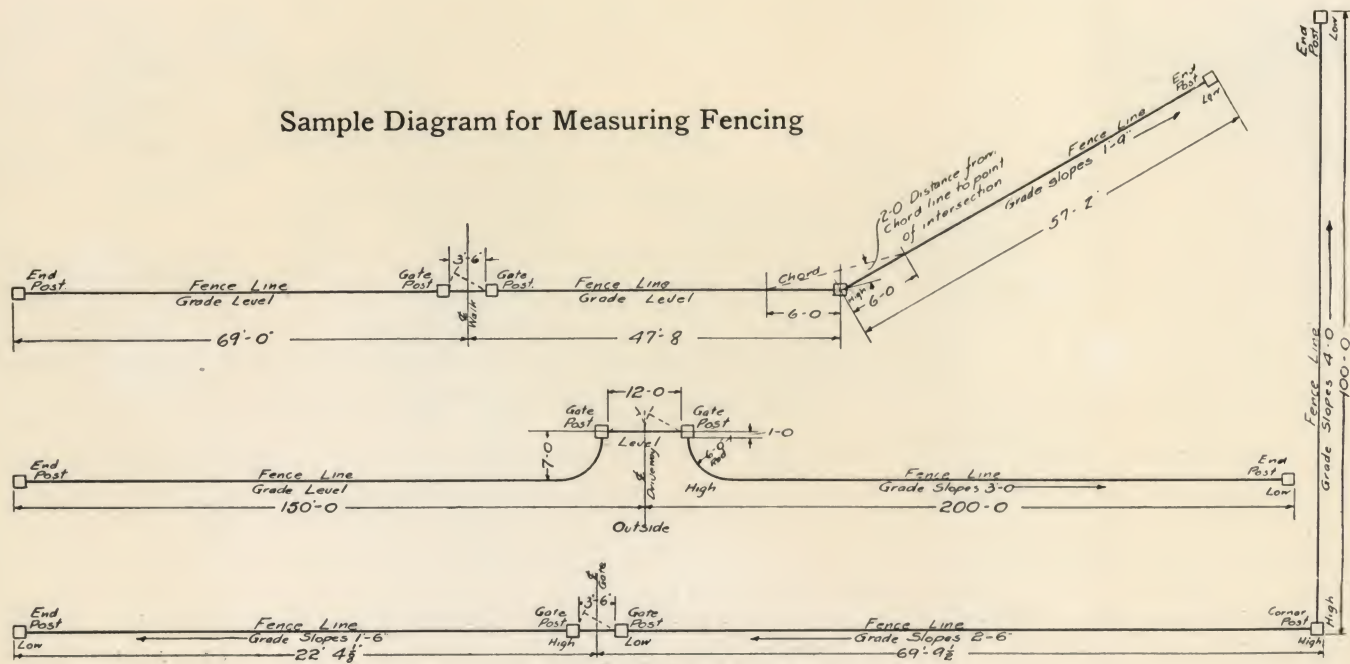

Sides and roof are of best quality Keystone *galvanized* steel.

All hardware is heavy galvanized.

Windows, all steel sash and frame, are very strong, "Self-ventilating" type with $\frac{1}{4}$ wire glass to comply with all fire laws.
